

e-Benefit Suite

- Enables Consultative Sales Approach
- Increases Sales and Service Opportunities
- Intuitive Design, Built for Business Users
- Single View of All your Benefits Clients

BRIX™

Grow your benefits business with an employee benefit administration platform powered by the BRIX™ e-Benefit Suite.

Differentiate your Firm

Offer each of your clients an online benefits administration that is entirely customized to their benefits package.

The functionality of the BRIX™ suite supports group health and welfare products, retirement plans and voluntary benefits. The suite also includes enrollment eligibility, evidence of insurability and dynamic health questions.

Increase per Client Revenue

BRIX™ gives you a consolidated view of all your clients and their benefits packages. This simplifies client management and enables benchmarking for consultative recommendations.

Our events notification feature can alert you when a client's employee has a change in status, increasing your cross-sell and service opportunities.

Reduce Costs

The BRIX™ platform is intuitive and designed for self-service, reducing administrative costs for you and your clients.

Our innovative, single bill functionality uses real-time eligibility information to generate the premium bill, eliminating overpayments and improving your client's cash flow.

Increase Retention & Loyalty

As your service and analytical capabilities expand, your firm's value and visibility with clients increases. Your customers view you as a strategic consultant and their commitment to your firm deepens.
